Pedders' TrakRyder steering dampers enhance driving feel and comfort by further reducing the jolts and impacts caused by heavy wheels and rough conditions. Designed as a direct replacement unit these heavy duty steering dampers offer an amazing steering feel for any off road conditions. We have recently superceded our range of 32mm bore (part number 132000 series) TrakRyder steering dampers to make way for an extended range of 35mm Foam Cell TrakRyder steering dampers.

TrakRyder 35mm Foam Cell Steering Dampers Features & Benefits:

- TrakRyder steering dampers feature an extra large 35mm bore on the 135000 series. This provides optimum performance via the Foam Cell technology that enables the steering damper to operate even when the vehicle is on a severe incline.
- Advanced control for a comfortable ride and precise handling.
- Direct original equipment replacement.

135018
