Pedders has further expanded its range of alignment kits to to give the technician 4 options to suit the Ford Falcon and AU/BA range.

Pedders Suspension's new 5412 and 5413 alignment kits feature new stud plates which fit into the chassis allowing the kits to be loosened or tightened from under guard for shim adjustment. Once fitted access to the engine bay is not required for adjustment. No longer does the technician have to struggle to gain access to the retainer nuts.
