FOR THE FOLLOWING MODELS:

MAKE	MODEL	DESCRIPTION	PART NUMBER
Ford	Falcon BA	Rear Alignment Kit	5411

Note: Pedders 5411 rear alignment kit to suit the Ford Falcon BA models without rear camber adjustment (excludes the XR & FPV series).

The Pedders 5411 Rear Alignment Kit fits to the upper inner rear control arm on the rear suspension & replaces the O.E. bush with an offset eccentric adjuster.

The 5411 allows the rear camber to then be adjusted to produce improved handling & reduced tyre wear. It provides the equivalent amount of camber adjustment as found in the current XR & GT range.

Heavy duty urethane bushings are used in the mountings, which also enhances tyre life and improves tracking.

For further information please contact your local Pedders expert or check out www.pedders.com.au
