New Shock Absorber Mounts

Shock absorber mounts (or strut mounts) play a critical role in steering, braking, safety, and handling. Strut Mounts are the components that locate between the vehicle chassis and the shock absorber and can have a dramatic effect on the feel and response of the vehicle to the driver.

Through extensive research and development and testing Pedders have expanded its range of rubber strut mounts kits to suit a wide variety of makes and models.

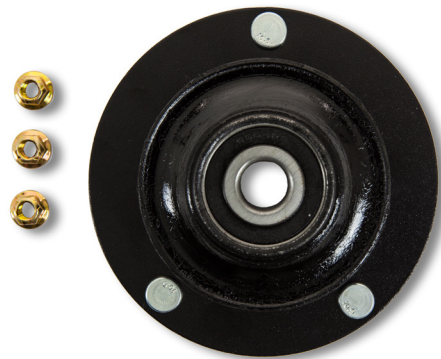

The latest range extension offers fitments to vehicles from Audi, Chrysler, Ford, Kia, Honda, Mazda, Mitsubishi, Nissan, Subaru, Toyota, Volvo and VW.

Features & Benefits:

- All new heavy duty design features that allows for increased steering precision.
- Pedders strut mounts are generally designed to suit Pedders shock absorbers only and in some circumstances may not be used in conjunction with other brand shock absorbers.
- Pedders strut mounts are the superior material choice for when high levels of suspension control and durability are required.
- They are particularly suited to applications requiring heavy load carrying ability or where regular exposure to corrosive materials is expected.
- Designed to endure the loads placed upon it over an extended period of time and give longevity of the product and satisfaction to the user.
- Pedders strut mounts also incorporate a special profile on the working surface to enhance grease retention.
- 2 Year 40,000km Nationwide Warranty.
