

PEDDERS CENTRE BEARING DROP KIT

NEW IN STOCK

Pedders Centre Bearing Drop Kit

Part #	Make & Model	Position	Description
5062	Ford Ranger PX & PXII All Models	Centre	Centre Bearing Spacer Kit
5062	Mazda BT50 UP & UR All Models	Centre	Centre Bearing Spacer Kit

Pedders 5062 Centre Bearing Drop Kit is designed to reduce issues relating to tail shaft vibration after installing a heavy duty suspension kit to the vehicle.

The centre bearing spacers are installed to the u-shaped cage that holds the centre bearing into position. This effectively lowers the position of the centre bearing whilst reducing the angle of the tailshaft and universal joints to reduce noise and vibration.

The kit is supplied complete with 12 x 3.9mm spacer washers, to suit for the spacing requirement identified (from 3.9mm to 23.7mm), depending upon your lift. In the Ford Ranger and Mazda BT50, it is not uncommon to experience tailshaft vibrations with even the smallest of suspension lifts. The Pedders 5062 Centre Bearing Kit is recommended to be fitted to all Ford Ranger PX & Mazda BT50 models that have a heavy duty suspension kit fitted.
