Pedders Drag Racing 90/10 Competition Shock Absorbers

Part #	Make	Model	F/R	Style
1305	Holden	Commodore VB-VP	F	90/10 Cartridge
1385L/R	Holden	Commodore VR-VY	F	90/10 Strut

Pedders Suspension has expanded its range of 90/10 Competition Shock Absorbers. Adding to the range this month we see new listings to suit the front of the Holden Commodore VB-VP and VR - VY models.

The Pedders Suspension 90/10 Shock Absorbers are designed to help transfer weight from the front of the car to the rear. This greatly improves drive traction on rear wheel drive competition dragway vehicles.

The damping control rates are also designed to provide:

- Low rebound rates to assist in weight transfer to the rear axle during launch acceleration.
- Very high compression rates are used to assist in maintaining weight transfer to the rear axle.

The Pedders Suspension 90/10 shocks physical design characteristics are also similar to the Pedders world famous GSR product range thus insuring a high performance shock absorber.

COMPETITION USE ONLY
