

Pedders Suspension

Pedders Rubber Bush Kit (Pk2)

Part #	Make	Model	F/R	Description
5803	Holden	Commodore/Statesman (all variants), VN-VZ, 88-06, All with IRS	R	Rear Lower Arm Positive Camber Bush (Outer Position)

Manufactured to suit all independent rear suspension (IRS) equipped Holden Commodore/Statesman variants to 6/2006, the Pedders 5803 rear trailing arm camber bush kit is an easily installed, direct replacement option designed to significantly reduce excessive negative rear wheel camber in the above models.

Made from heavy-duty yet compliant rubber, the 5803 bush kit combines excellent noise suppression and exceptional durability without negatively impacting the vehicle's ride quality.

Added to this, our trailing arm camber bush kit minimises unwanted deflection of the rear trailing arms under high-torque situations with the net benefits to the vehicle being reduced axle 'tramp' and more positive positioning of the rear suspension under acceleration/deceleration conditions.

The 5803 camber-correction bush kit has been tailor made for ease of installation as the rear cradle does not have to be removed or dropped. The Pedders 5803 also offers durability and, most important of all, optimal functionality.
