Pedders Suspension has recently expanded it's range of parts to now include Urethane Trailing Arm Bushes to suit the above mentioned makes and models. Rear trailing arms bushes can often provide very little or no response at all to driver input. Upgrading your existing rubber trailing arm bushes to Pedders urethane bushing will assist in providing a 'tighter' feel to your car which is preferable for drivers who require more feedback from their vehicle when driving. These products can be installed as an upgrade and not necessarily just to replace worn parts. Pedders Urethane bushes provide better handling, extended bush life & improved performance.

For further information please contact your local Pedders Suspension specialist or check out www.pedders.com.au Note: See our Pedders Suspension catalogue for up to date information.
