BSR53XZ	Subaru/Toyota	BRZ/FT86	R	Whiteline 18mm 3 Point Adjustable Sway Bar

Pedders and Whiteline have teamed up to bring you a selection of recommended performance suspension components to suit the Toyota FT86 & Subaru BRZ. Pictured in set we have a series of images that showcase the award winning Pedders eXtreme XA adjustable coilover kit, Whiteline adjustable and non-adjustable sway bars as fitted to the Pedders FT86.

The installation is relatively straight forward with the OE components being swapped over for the new Pedders & Whiteline ones. Once fitted the car is finished off with a Pedders performance 4 wheel alignment to secure the cars road holding capabilities. The result is outstanding with a greatly increased level of grip upon entry and exit into the corners. These components are suitable for daily driving and for weekend track days.

The immediate benefits of the kit is as follows:

Pedders eXtreme XA Adjustable Coilovers – Enables the ride height to be adjusted to suit the drivers needs. An added feature is the on car adjustment of ride handling through the use of the knob adjuster with 30 position click clockwise and anti clockwise movement of bump and rebound. This enables the driver to fine tune the handling characteristics of the cars ride.

Whiteline 3 Point Adjustable Sway Bars – The 3 point adjustable sway bars provide more grip, better handling and better performance. Whiteline adjustable sway bars allow its rate to be altered by increasing or reducing the length of the lever arms. This permits the roll stiffness to be tuned for different situations without replacing the entire bar. The stiffer the bar, the more force required to move the left and right wheels relative to each other. This increases the amount of force required to make the body roll. With a choice of either 16mm (BSR53Z) or 18mm (BSR53XZ) sways bars you can be sure to match the right bar for your driving needs.

Whiteline Non Adjustable Sway Bars – The 20mm fixed position sway bars provide more grip, better handling and better performance. By far the best dollar for dollar handling improvement you can make to your vehicle.
