Pedders Urethane Bush Kit to Suit Holden Captiva 2006-2011 CG

Pedders Part #	Application	Kits Required	Location
EP7664	Control Arm Lower Outer Hub Bush	1 - Kit Contains 2 Bushes	Rear

New control arm bushings for Holden Captiva Arms

Pedders latest addition to its range of problem solving bushings, sees us release a new rear control arm lower outer hub bush to suit the Holden Captiva . A cracked OE bush is the first sign that the bush is starting to fail, so it's important to have this item checked regularly and replaced if unserviceable with Pedders Part Number EP7664.

Note: To replace with original OE bushes, the wheel hubs must also be replaced at a considerable cost. With Pedders Part Number EP7664 there is no need to replace the wheel hubs as these units are a direct fitment specification, saving you money.

The new bush is made from normal duro urethane which offers many key features and benefits:

- The O.E. bush is prone to splitting over time and Pedders new part # EP7664 is a cost effective direct O.E. replacement part made from quality urethane that is steel cased for longevity.
- Engineered for direct fitment to the Holden Captiva these control arm urethane bushings enhance road holding, steering and performance without compromising the smooth ride quality associated with the vehicle.
- The approximate fitting time is around 3 hours to install both bushes as all brakes and drive shafts need to be removed.

EP7664
