| 429006-22A | Sway bar - 22mm X heavy duty blade adjustable. 3 point adjustable | R |

VF Commodore – Adjustable sway bars now available

Now available from Pedders - uprated front and rear adjustable sway bars. The Pedders bars come engineered to reduce body roll, enhance road holding and dramatically sharpen the cornering of the VF Commodore. Pedders adjustable sway bars allow their stiffness to be altered by increasing or reducing the length of the lever arms. This permits the roll stiffness to be tuned for different situations without replacing the entire bar. The stiffer the bar, the more force required to move the left and right wheels relative to each other. This increases the amount of force required to make the body roll.

Boasting a 4 point adjustable 26mm front bar and 3 point adjustable 22mm rear bar, fine tune handling behaviour by stiffening or softening (via the adjustment holes) the bar for maximum cornering grip levels. The bars also come complete with high performance polyurethane mount bushings.

If you looking for a bang for your buck handling upgrade or looking to get even more out of your Pedders SportsRyder or XA Coilover suspension set up, Pedders adjustable sway bars will enhance the performance of your vehicle.
