### NPR - VF Commodore – Polyurethane Bushings Now Available

Now available from Pedders is an extensive range of bushing and alignment solutions to enhance the steering and handling of the recently released VF Commodore.

Pedders polyurethane bushings are designed to allow flexibility of movement of the entire suspension while maintaining correct mounting and alignment of individual parts. They are used to position suspension and steering components such as sway bars, shock absorbers, torsion bars and control arms. In addition bushes help absorb road shock and enhance comfort while some are designed to reduce noise vibration and harshness.
