909981R	Subaru Impreza GD & GG 2002-2007	R	Pedders SportsRyder EziFit Assembly Right

Pedders SportsRyder EziFit is an ideal alternative to buying separate components when converting your Subaru Impreza model from the OE suspension to a lowered suspension setup. Reduced installation time is the key benefit from the use of the Pedders SportsRyder EziFit as the spring, bumpstop, shock and shock mount is all supplied pre-assembled. No need to use a spring compressor as the work is already done for you! Just unbolt the old and bolt in the new!

#### Key Features:

- Supplied with pre-assembled suspension components including Pedders Gas SportsRyder Shock Absorber, Heavy Duty Lowered SportsRyder Coil Spring, Bumpstop, Boot Kit and unique offset Strut Mount.
- Reduced installation time as the components are supplied pre-assembled and ready for direct fitment.
- Individually shock dyno tested for quality assurance.
- The Pedders EziFit can be installed as an alternative to coilover suspension which may be too harsh or require replacement.
- Pedders larger bore Gas SportsRyder Shock Absorbers included in the EziFit kit are made from heavy-duty twin-tube construction technology & heavy-duty reinforced double-welded mountings for long-term durability.
- The Lowered SportsRyder coils included in the kit are also heavy duty units designed to improve ride and handling. These units are designed to match the Gas SportsRyder shocks in perfect harmony. Manufactured to provide the precise spring rate required for ride control.

- Unique front strut mounts feature offset bearings to provide additional camber or caster depending on your needs. Camber can also still be tuned via the lower original style camber bolts. These unique offset front mounts are not harsh but are a step up from standard Subaru mounts & feature a slightly angled bearing to ensure reduced stiction.
- 2 Year / 40,000km Warranty
