**ISUZU D-MAX**  
06/2012-ON, 2 & 4 DOOR UTE,  
2X4 & 4X4 (HIGH RIDE MODELS ONLY)

### Does your Isuzu D-Max carry loads for a living?

Are you serious about what you pack into the back of your D-Max? Pedders has the answer for you with a certified GVM upgrade kit.

When your D-Max is fully loaded for the journey ahead or if you're carrying the tools of your work trade, chances are that your D-Max may be overloaded beyond its GVM and you may not even know it. Common items such as tools, tool boxes, cargo, bull bars, winches, towbars, recovery gear and even your passengers all combine to increase the overall gross vehicle mass. Through extensive testing and engineering certification Pedders have not only increased the GVM but also increased the front and rear axle capacities to ensure you have the payload you need. Every vehicle on our roads today has an official legally allocated gross vehicle mass rating (GVM). The GVM rating is a legal weight figure (in kg's) that results in the total maximum allowable weight of a vehicle when fully loaded. It's essentially the maximum legal weight, that you can safely drive at for that particular vehicle.

Pedders now offer a GVM upgrade solution for selected D-Max models to assist in compliance for GVM and axle ratings. The reason for this solution is for the following requirements: O.H.&S. vehicle insurance, warranty issues and being road legal. Through exhaustive and detailed testing, the Pedders GVM Upgrade Kits have been approved by the Federal Department of Infrastructure and Transport.

### ISUZU D-MAX GVM UPGRADE SOLUTION FROM PEDDERS

- Support network of over 120 outlets Australia wide.
- All components installed as part of a Pedders GVM upgrade package are backed by a Pedders 2 Year/40,000kms Nationwide Warranty.
- When fitted with a Pedders GVM kit the Isuzu D-Max 06/2012-ON has a certified GVM rating of 3450Kgs.
- The GVM + upgrade kit is an Ideal choice for those towing caravans, horse floats, camper and general trailers who need to comply with federal GVM laws.
- Great for the serious off road driver fitted with bull bars, winches, recovery equipment and underbody protection looking for compliance to the federal GVM laws.
- When the GVM Upgrade kit has been installed to a new vehicle by the trained Pedders technicians at a Pedders store, a compliance plate will be fitted. The new vehicle can now be registered with new increased G.V.M. This procedure will allow the vehicle to be legally used in all states of Australia. For vehicles that have already been road registered, the vehicle is to be inspected by an authorised Automotive Engineer in that state and be issued with a compliance certificate.
- So, if you are planning ahead with an impending new vehicle purchase, or have realised that your current vehicle isn't quite handling the load we have the solution.
