

# PEDDERS NEW PRODUCT

**NOW IN STOCK**

## VE PEDDERS SPRINGS

Pedders Suspension has a full set of raised height country pack coils for those VE Commodores that need just little extra ground clearance for country driving. When towing a caravan/boat or trailer the rear of the vehicle will squat noticeably. The Pedders Suspension 7955 heavy duty towing coils are specifically designed to enhance the vehicles load carrying characteristics. They are also particularly suitable for reps who are often carrying loads by trailer or in the boot of the vehicle.

7855 & 7854

As fitted with 7955 coils to the rear.

Right Rear  
675mm RTG

As fitted with 7855 & 7854

7955

Right Front  
675mm RTG

### PEDDERS SPORTS RYDER SUSPENSION

**Pedders Sports Ryder Lowered Coils**  
Fronts: Part Number 2956  
Rears: Part Number 2957

2956 & 2957

Right Rear  
635mm RTG

Right Front  
645mm RTG

Sports Ryder products, either as stand alone replacement parts or when integrated into a full Sports Ryder suspension system, effectively out-perform original equipment whilst at the same time enhancing a vehicle's handling characteristics. Sports Ryder lowered coil springs improve traction, ride quality, turn-in and cornering ability whilst offering greater steering precision and stability under braking. Pedders provides you with a 2 tiered approach to lowering the VE Commodore. The first approach with the use of the 2956 & the 2957 coils provides an all round lowering approach that is suitable for normal everyday street driving.

**Pedders Sports Ryder Lowered Coils**  
Fronts: Part Number 2954  
Rears: Part Number 2955

2954 & 2955

Right Rear  
615mm RTG

Right Front  
625mm RTG

The second tiered approach of lowering for the VE Commodore is through the use of the 2954 & 2955 coils that provide an aggressive stance for that 'show' and performance look.
