Pedders has expanded its range of Urethane Bushes. The new inclusions to the range include a wide variety of model fits for many makes and models.

The EP3451 is specially designed for improved articulation to improve link pin longevity for VT-On Model Commodores.

Of special interest is the EP2100 for the Toyota Camry CU10 which solves a common problem with a cost effective repair when compared to the O.E. equivalent.

For further information upon the release of Pedders new bushes please contact your local Pedders Suspension Specialist or check out [www.pedders.com.au](http://www.pedders.com.au)

Note: See our Pedders Suspension Catalogue for up to date information.
