TOP STRUT MOUNT STEERING BEARING

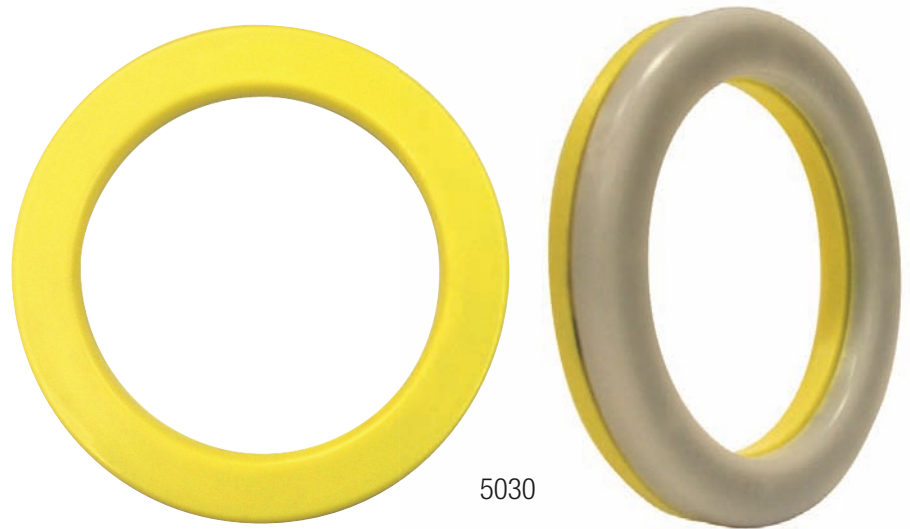

PEDDERS TOP STRUT MOUNT STEERING BEARING

PART #	Make	Model	DESCRIPTION
5030	Holden	Commodore VR - VE	Top Strut Mount Steering Bearing

The Pedders Suspension 5030 is a critical steering bearing that carries all the turning load of the front of the vehicle on all commodores from VR – VE.

Most of us know that these bearings are prone to popping apart on disassembly of the strut but also wear from constant load and impact and can become notchy and effect steering precision.

The Pedders Suspension 5030 bearings are a premium replacement part to solve these problems and complement the Pedders Suspension heavy duty rubber 5851 top mount.

5030

5851
