Rear Springs	
Part #	Description
2643	Sports Ryder
2589	Sports Ryder
7843	Heavy Duty Std Height
7589	Heavy Duty Raised Height

Strut Mounts

With the 5851 Pedders have redesigned the steel reinforcement plates to reduce the internal stress's applied to the mount. Along with redesigning the mouldings and using improved rubber the 5851 improves longevity.

Compared to the OE equivalent the 5851 strut mount restricts flex and improves handling and shock absorption, providing the owner with precise turn in and improved drivability.

Strut Mounts	
Part #	Description
5851	Bearing Plate Strut Mount

Front Sway Bar links

Pedders 424151 features high performance ball socket link with alloy mounts which replaces the original rubber bushes. Other additional features include: Chrome plated assembly, Heavy duty rod, Smooth articulation, Stops bush deflection resulting in less body roll and Effectively increases sway bar rate by up to 12.8%.

Front Sway Bar Links	
Part #	Description
424151	Sports Ryder Stabilizer Links

Radius Rod Bush Options

The EP9166E economy radius rod bush provides an improved urethane mounting for the front of the radius rod with a fixed castor position .25 degrees more positive than OE.

The EP9166 premium alignment bush provides an improved urethane mounting for the front of the radius rod and also allows full castor adjustment ia the supplied shim kit. It also comes with a unique bell shaped front mounting washer that may be fitted 2 ways to provide a "comfort" or a "sports" setting for the firmness of the bush.

Front Urethane Bushes	
Part #	Description
EP9166E	Urethane Radius Rod Bush
